Next generation sequencing, a paradigm shift

Source: GenBank statistics
(<https://www.ncbi.nlm.nih.gov/genbank/statistics/>)

Adapted from genome.gov/sequencingcosts & Athina Gkazi (2021). An Overview of Next-Generation Sequencing. Technology Networks: Genomics Research.

We have sequences... now what?

See anything yet?

Entry: sequence.fasta

Genome browser and annotation tool

Artemis

- Visualization of sequence
 - DNA
 - six frame translation
 - Panoramic and sequence view
- Annotation
 - Features
 - Mapped and listed
 - Editable
 - In layers (entry)
- Perform and view analysis
 - basic analysis
 - Basic stats & index can be plotted
 - import and view the results of other searches/analysis
 - Different lines of evidence can be seen together

The screenshot shows the Artemis genome browser interface. The title bar reads "Artemis Entry Edit: S_typhi.dna". The menu bar includes "File", "Entries", "Select", "View", "Goto", "Edit", "Create", "Write", "Run", "Graph", "Display", and "(Noddy)". The main window displays a DNA sequence with several features highlighted in different colors: yellow for CDS (Coding DNA Sequence), green for misc_feature, and orange for other features. The sequence is shown in a panoramic view with a scale from 0 to 7200. Below the sequence, a legend lists various features and their corresponding colors and descriptions.

Feature	Start	End	Description
CDS	190	255	Orthologue of E. coli thrL (LPT_ECOLI); Pasta hit to LPT_ECOLI
CDS	337	2799	Orthologue of E. coli thrA (AKIH_ECOLI); Pasta hit to AKIH_ECOLI
misc_feature	343	369	PS00324 Aspartokinase signature
misc_feature	2314	2382	PS01042 Homoserine dehydrogenase signature
CDS	2801	3730	Orthologue of E. coli thrB (KHSE_ECOLI); Pasta hit to KHSE_ECOLI
misc_feature	3066	3103	PS00627 GHMP kinases putative ATP-binding domain
CDS	3734	5020	Orthologue of E. coli thrC (THRC_ECOLI); Pasta hit to THRC_ECOLI
misc_feature	4022	4066	PS00165 Serine/threonine dehydratases pyridoxal-phosphate at
CDS	5114	5887	Orthologue of E. coli yaaA (YAAA_ECOLI); Pasta hit to YAAA_ECOLI
CDS	5966	7396	c Similar to Bacillus subtilis amino acid carrier protein alst
misc_feature	7091	7138	c PS00873 Sodium:alanine symporter family signature
CDS	7665	8618	Pasta hit to TALA_ECOLI (316 aa), 65% identity in 311 aa over
misc_feature	7755	7781	PS01054 Transaldolase signature 1

Overview

Artemis is a free genome browser and annotation tool that allows visualisation of sequence features, next generation data and the results of analyses within the context of the sequence and also its six-frame translation.

Download and Installation

Please see our [GitHub page](#) for download and installation instructions.

Learn and Support

For information and advice on using this software please see our [GitHub page](#).

In addition, an email discussion list called [artemis-users](#) is available and posts to the list since September 2001 are archived at [mail-archive.com](#)

Chado

Artemis and ACT can be used to connect to [Chado](#) databases. They are being developed to read from and write to the database and perform the same functions as the standard Artemis and ACT.

- [Chado overview](#)
- [Chado admin](#)
- [Chado practical guide](#)
- [Data storage](#)

Genome browser and annotation tool (Rutherford et al, 2000)

Tool Type

- [Annotation](#)

Screenshots

Free and regularly updated software
 • (<https://www.sanger.ac.uk/science/tools/artemis>)

Developed in JAVA in 1998

Available for UNIX, macOS and Windows

Related Tools

- [Athen Inter-Genome Annotation Tool \(ACT\)](#)
- [BamView](#)
- [DNAPlotter](#)
- [GeneDB](#)

Developed for annotation and analysis of prokaryotic and small eukaryotic genomes

Can be used simply as a sequence viewer allowing the visualization of sequence and annotation taken directly from EMBL or GeneBank.

Files in Artemis

Sequence	Annotation
.fasta	.tab
.seq	
.dna	
	.embl

It can read several file formats (FASTA, EMBL, GENE BANK, GFF).

EMBL

Two-character line code indicates the type of information contained in the line

Features of the Artemis module

Exercise 1: Familiarize with Artemis

- Loading sequences and annotation files
- Changing the view
- Searching and getting around

Exercise 2: Find insight within a genome

- Graphs and plots

Exercise 3: Analyze a genome

- Basic analysis
- Generating features

Exercise 4: Feature editing

- Adding and Modifying annotations
- Finding evidence : Database searches
